"This great little space, and one of the smaller commercial office availabilities you'll find in midtown. The layout is basically front and back, with entry into a reception area, then leading to a private office. There is a storage closet in the private office, and it also has a large window for natural light. The building has both heating, and air conditioning. The space has carpet flooring, painted walls, 8' dropped ceiling, and sprinkler protection throughout. This is a great space for an individual stylist, a massage therapist, or any small professional office use."
